

FOUR REASONS for Chester TO SAY NO TO FLUORIDE in our drinking water!

- 1. Commonly used fluoridation chemicals cause increased absorption of lead...This increased lead exposure is connected to increases in learning disorders.**
- 2. The American Dental Association and the Centers for Disease Control recommend that parents of newborns avoid using fluoridated water when mixing milk formula but they offer no outreach to tell parents this information.**
- 3. Urban drinking water systems are more likely to be fluoridated than suburban and rural water systems, affecting blacks and Hispanics more than whites.**
- 4. Chester's drinking water has been fluoridated without OUR vote or approval!**

WHAT CAN WE DO?

JOIN US WEDNESDAY or THURSDAY

MARCH 11TH @ 6pm - 7PM @ YWCA CHESTER 2 E. 7th St., Chester, PA

MARCH 12TH @ 6pm - 7 PM @ YWCA CHESTER 2 E. 7th St., Chester, PA

**LEARN MORE ABOUT FLUORIDE ON EITHER DAY AND
FIND OUT HOW WE PLAN TO STOP IT!**
